INSTRUCTION MANUAL

SF

Automatic Solder-Wire Feeder Station

This manual corresponds to the following references:

SF-110VB (110-120V) with Guide Kit ø1mm

SF-210VB (230V) with Guide Kit ø1mm

Packing List

The following items are included:

**Automatic Solder-Wire
Feeder Control Unit** 1 unit

**Auto Solder-Wire
Handle** 1 unit
Ref. SF280

Guide Kit 1 unit
Ref. GSF10V-B
already assembled

Reel Support 1 unit
Ref. 0018624

includes:

Ref. 0019301 (x1) - Support
0018033 (x1) - Axis
0003412 (x2) - Lock Ring
0014427 (x2) - Knob

Key Set for SF 1 unit
Ref. 0019341

includes:

Ref. 0012574 (x1) - Allen key Ø 2.5
0017631 (x1) - Spanner
0741610 (x1) - Allen key Ø 1.5

Power cable 1 unit
Ref. 0023715 (100V/120V)
0023714 (230V)

Manual 1 unit
Ref. 0028008

Features and Connections

Automatic Solder-Wire Feeder Control Unit

SF280 Automatic Solder-Wire Handle

Tool Assembly

Connect the tool to the control unit following this steps:

Insert and push the guide nozzle until the end (1) and tighten the screw (2).

Connect the jack (3).

Solder-Wire Loading

Put the solder reel into its support (1).

Introduce the solder wire into the inlet nozzle (2) until it reaches the wheels (3).

Use the *Tin Reload Process* in the *Main Menu* (4).

The Reload Process screen opens. Press  to start the process.

Make sure the wire passes through the Intermediate Nozzle and enters into the Guide Tube (5).

Solder-Wire Unloading

With Solder Wire Perforation

To unload solder wire with perforation that has already passed through the guide tube, cut the wire between the solder reel and the inlet nozzle (1).

To extract the wire out of the tube, hold the tool on your hand and press  until the wire stops moving forward.

Grasp the wire coming out of the outlet nozzle with a pliers and pull from it until it is completely out.

With Solder Wire Perforation

When using a guide kit without solder wire perforation, press  until the wire is completely wound on the solder reel to unload the solder wire. It is best to rotate the reel by hand as the wire is being pulled back in order to keep it neatly arranged on the reel.

Or, If preferred, proceed as described before for perforated solder wire unloading.

Changing Guide Kits

Changing Wheels and Blade

For this operation, disconnect the device from the mains. Disconnect the tool from the control unit and open its cover.

Use the Allen key and the spanner, provided with the station. First disassemble the guide tube (6), the support and traction wheels, or the guide wheel, the blade and its clamp (4)+(5). Then, disassemble the nozzles (2)+(3). Disassemble the counter wheel (1).

Assembly with Solder Wire Perforation:

Assemble the counter wheel (1).

Insert the intermediate nozzle (2) until its collar rests against the housing and tighten the screw.

Assemble the inlet nozzle (3).

Assemble the guide wheel* (4) and tighten the screw.

Assemble the blade first, then mount the blade clamp (5) onto the same axis and tighten the screw. **Caution:** handle the blade carefully to avoid injury.

Insert the guide set (6).

Assembly without Solder Wire Perforation:

Assemble the counter wheel (1).

Insert the intermediate nozzle (2) until its collar rests against the housing and tighten the screw.

Assemble the inlet nozzle (3).

Assemble the support wheel* (4) onto the axis and tighten the screw.

Assemble the traction wheel (5) and tighten the screw.

Insert the guide set (6).

Outlet Nozzle Replacement

Flux can cause clogging at the outlet nozzle of the guide tube set and it can be necessary to replace the worn or clogged outlet nozzle.

Note: There is a nozzle size for each soldering wire diameter. The use of the nozzle is necessary as its inner diameter is adjusted to the solder wire diameter and guides the wire with greater precision.

To replace the outlet nozzle, follow these steps:

First, unload any remaining solder wire that might still be inside the guide tube (see page 5) and then unplug the tool. Unscrew the spring inwards (2), following the downward direction of the spring.

Once the outlet nozzle is released from the spring, pull the outlet nozzle out (2) and then remove the spring (3).

Place the new outlet nozzle onto the guide tube set (4) and then screw back the spring onto it to fix the outlet nozzle onto the guide tube (5).

Guide Tube Replacement

To replace the guide tube, follow the outlet replacement steps until reaching no. 3. Once both the outlet nozzle and the spring are removed, open the guide clamp knob (6) and remove the guide tube (7).

Insert the new guide tube into the tool, close the guide clamp knob to fix it in place and follow steps 4 and 5 to fix the outlet nozzle.

Enter "Tool Settings" at the SF control unit main menu and select the proper wire diameter to complete the process.

Control Process

Work Screen

Choose between continuous, discontinuous and program mode:

Program Mode

With the SF you can define up to 35 dynamic programs. In each one you can configure up to 3 steps with different wire length and dispensing speed.

Execute them sequentially and cyclically with the 'Edit Concatenation List' option.

Troubleshooting

Station troubleshooting available on the product page on www.jbctools.com.

Tool Stand

Stand for SF280 Auto Solder-Wire Handle

Ref. SF-SE

It allows leaving the tool on a support when not in use and has a cable collector to keep the work space tidy.

Maintenance

Before carrying out maintenance, always allow the equipment to cool down.

- Clean the station screen with a glass cleaner or a damp cloth.
- Use a damp cloth to clean the casing and the tool. Alcohol can only be used to clean the metal parts.
- Periodically check all cables and tubes.

- Replace a blown fuse as follows:

1. Pull off the fuse holder out and remove the worn fuse. If necessary use a tool to lever it off.

2. Insert the new fuse into the fuse holder and assemble it to the station.

- Replace any defective or damaged parts. Use original JBC spare parts only.
- Repairs should only be performed by a JBC authorized technical service.

Safety

It is imperative to follow safety guidelines to prevent electric shock, injury, fire or explosion.

- Do not use the units for any purpose other than soldering or rework. Incorrect use may cause a fire.
- The power cord must be plugged into approved bases. Be sure that it is properly grounded before use. When unplugging it, hold the plug, not the wire.
- Do not work on electrically live parts.
- The tool should be placed in the stand when not in use in order to activate the sleep mode. The soldering tip or nozzle, the metal part of the tool and the stand may still be hot even when the station is turned off. Handle with care, including when adjusting the stand position.
- Do not leave the appliance unattended when it is on.
- Do not cover the ventilation grills. Heat can cause inflammable products to ignite.
- Avoid flux coming into contact with skin or eyes to prevent irritation.
- Be careful with the fumes produced when soldering.
- Keep your workplace clean and tidy. Wear appropriate protection glasses and gloves when working to avoid personal harm.
- Utmost care must be taken with liquid tin waste which can cause burns.
- This appliance can be used by children over the age of eight and also people with reduced physical, sensory or mental capabilities or lack of experience provided that they have been given adequate supervision or instruction concerning the use of the appliance and understand the hazards involved. Children must not play with the appliance.
- Maintenance must not be carried out by children unless supervised.

Complies with CE standards.
ESD safe.

Warranty

JBC's 2 year warranty covers this equipment against all manufacturing defects, including the replacement of defective parts and labor.

Warranty does not cover product wear or misuse.

In order for the warranty to be valid, equipment must be returned, postage paid, to the dealer where it was purchased.

Get 1 extra year JBC warranty by registering here:

<https://www.jbctools.com/productregistration/>

within 30 days of purchase.

If you register, you will receive e-mail notifications about new software updates for your registered product.

This product should not be thrown in the garbage.

In accordance with the European directive 2012/19/EU, electronic equipment at the end of its life must be collected and returned to an authorized recycling facility.
